

HPV VACCINE IS CANCER PREVENTION

Physician Name: _____

Month: _____

Appendix D1: Strong Provider Recommendation Tracking

Recommend the HPV vaccine the same way and on the same day you recommend Tdap and meningococcal vaccines. A strong recommendation from you is the main reason parents decide to vaccinate. A strong recommendation goes something like this:

“Your child needs 3 vaccines today – Tdap, HPV and meningococcal.”

All physicians participating in the project should track their strong recommendation and dose 1 administration. Add together the Box A and Box B totals from all participating physicians for reporting on the Practice Project Update in QIDA for each data cycle.

Patient #	Date of visit	Patient Age		Did you give a strong recommendation for the HPV vaccine?		Was dose 1 of HPV vaccine administered?		Reason for vaccination refusal (if applicable)
		11	12	Yes	No	Yes	No	
Example	1/1/16		x	x		x		N/A

		Total Yes:		Box A		Total Yes:		Box B

HPV VACCINE IS CANCER PREVENTION

Practice Name: _____ Month: _____

Appendix D2 - Reminder/Recall Call Tracking

This tracking form is to help your practice track the number of reminder/recall contacts made regarding HPV vaccination status. You can use this form to help track calls made, postcards sent, etc.

Total number of contacts for the month (Box 1) will be reported on the Practice Project Update in QIDA each data cycle.

Date	Daily tally of HPV vaccine reminder/recall contacts	Total contacts today
Example: 5/3/17	### ### //	12
Total Reminder/Recall contacts made this month →		Box 1:
